

Contending with **taste challenges** because of actives and functional ingredients?

**We've got answers.**

Bitter. Metallic. Sour. Acidic. Lingering off-notes. You're working to deliver the nutritional and functional needs of your consumers – but the taste and aroma challenges you're facing can be daunting. At the same time, live consumer tasting and validation can be complicated and time-consuming.

**What if you could “block the blech” AND predict and validate your solution in an easier way?**

***Our three-step plan to help you overcome taste challenges:***

- 1. Discover.** Open access to an expert team that will examine your specific needs with a “whole product” approach. Let's quickly identify the variables at play in your product.
- 2. Customize.** You deserve a custom solution, and that's what you will get, backed by decades of taste modification expertise for nutritional & over-the-counter (OTC) products – plus the latest cutting-edge analytical techniques.
- 3. Hit Go.** Validated, high-quality taste solutions developed and delivered with a speed you won't believe. Put us to the test and prepare to be wowed.

**It's time to move forward. It's time for a custom solution, catered to your specific needs. It's time for Optify®, McCormick Flavor Solutions' suite of taste modification solutions.**
